

Damien Demontis

Full Stack Developer

@ damien.demontis@epitech.eu

 LinkedIn |  GitHub |  demontis.dev

📍 Frouard, Grand Est, France

PROFESSIONAL SUMMARY

Experienced Full Stack Developer with 3+ years building scalable systems and robust APIs. Proven track record in Node.js, TypeScript, and database design, with expertise in secure authentication systems and cloud infrastructure. Demonstrated ability to architect and deliver high-performance solutions that handle complex data flows and user interactions. Teaching experience has strengthened my analytical thinking and ability to design efficient, maintainable systems. Passionate about creating innovative solutions that solve real-world problems and contribute to meaningful technological advancement.

EDUCATION

EPITECH - European Institute of Technology

Nancy, France

Master in Computer Science; **GPA: 3.7/4.0**

Sep 2020 – Aug 2025

Information Technology Expert

Key Highlights: Valedictorian of Nancy campus, Teaching Assistant for 3 consecutive years, Project-oriented learning methodology with emphasis on practical software development, Active member of CodingClub organizing workshops for high school students

Keimyung University

Daegu, South Korea

Study Abroad - Game Development & AI

Sep 2023 – Jul 2024

International Exchange Program

Focus Areas: Video game development, Artificial Intelligence, VR/AR technologies, Korean language learning

Video: [Study Abroad Experience](#)

SKILLS

Backend & APIs: Node.js, TypeScript, Express, REST APIs, WebSocket, Java, C/C++, C#, PHP, Django

Databases: MongoDB, MySQL, PostgreSQL, Firestore, Redis

DevOps & Cloud: Docker, Kubernetes, AWS, Google Cloud Platform, GitLab CI/CD, Jenkins, Linux, Firebase

Frontend: React, React Native, JavaScript, HTML5, CSS3, Tailwind CSS, Vue.js, Nuxt.js

Security & Architecture: Authentication systems, Microservices, API security, System design

AI & Computer Vision: PyTorch, TensorFlow, OpenCV, PyQt6, Machine Learning

Game Development: Unity, C#, Unreal Engine, SFML, OpenGL, TCP/UDP

Languages: French (Native), English (C1 - TEPITECH 945/990), Italian (Conversational), Korean (A2)

EXPERIENCE

EPITECH

Nancy, France

Pedagogical Mentor — MSc Curriculum

Mar 2025 – Present

- Provide dedicated mentorship to Master of Science students, overseeing advanced topics in web development (Nuxt, Pinia, Deno), DevOps (Docker, Kubernetes, Jenkins), and broader software engineering best practices.
- Develop and maintain custom systems to optimize daily workflows, including a cloud-based facial recognition attendance platform leveraging Firestore, PyQt6, OpenCV, and PyTorch.
- Hold conferences on various tech topics, cybersecurity, AI, and History of Games, creating engaging content that motivates students.

EPITECH

Nancy, France

Regional Assistant — PGE & MSc Curriculums

Sep 2021 – Mar 2025

- Mentored students in PGE curriculum for 3 years in fundamental programming concepts (C, C++, SFML graphics programming, design patterns).
- Introduced containerization concepts with Docker and web development basics, contributing to dynamic learning environment.
- Recognized as top-performing teaching assistant, uniquely offered the assistant position for three consecutive years.

Leon'Art (Student Startup)

Technical Lead & Project Manager

Nancy, France

Apr 2023 – Mar 2025

- Architected and developed scalable backend systems using Node.js, TypeScript, and Express, implementing secure authentication and payment processing with Stripe API integration.
- Designed and maintained RESTful APIs and webhook systems for real-time event notifications, ensuring reliable payment processing and social feature updates.
- Led cross-functional development team, managing database design (MongoDB), cloud infrastructure (Google Cloud), and deployment pipeline with Docker and Kubernetes.

+Simple

Web Developer Intern

Nancy, France

Apr 2023 – Aug 2023

- Architected and implemented backend API improvements during migration from Django monolithic to modern Nuxt.js frontend, optimizing database queries and API response times.
- Enhanced system scalability and maintainability through microservices architecture principles, implementing comprehensive testing strategies and CI/CD pipelines.
- Delivered measurable performance improvements: 50% reduction in page load times and 30% increase in test coverage through systematic backend optimization.

ACORIS Mutuelles

Web Developer Intern

Nancy, France

Jul 2021 – Dec 2021

- Developed frontend solutions using WordPress and PHP, creating custom themes and plugins to enhance user experience and functionality.
- Designed and maintained database architecture using MySQL, ensuring data integrity and efficient query performance for internal communication systems.
- Collaborated with cross-functional teams to gather requirements and deliver robust intranet solutions that improved organizational workflow efficiency.

PROJECTS

AI Facial Recognition Attendance System | [GitHub](#)

- Developed secure backend system for facial recognition authentication using Python, OpenCV, and PyTorch. Implemented RESTful APIs for real-time processing, cloud database integration with Firestore, and automated reporting system. Successfully deployed at EPITECH with focus on privacy and data security.

Inept-Intruder - Multiplayer Game | [GitHub](#) | [Demo](#)

- Multiplayer game where CCTV man (player) helps another player go through a trapped factory environment. Built with Unity, C#, featuring multiplayer cooperation and CCTV assistance mechanics.

Wii Tanks Remastered | [GitHub](#) | [Demo](#)

- Recreation of the classic Wii Play Tank game with enhanced graphics and mechanics. Built with Unity, C#, featuring classic tank gameplay and smooth controls.

Leon'Art - Art Marketplace | [GitHub](#)

- Architected and developed full-stack marketplace platform with focus on backend systems. Built scalable APIs using Node.js, TypeScript, and Express, integrated secure payment processing with Stripe, and implemented webhook systems for real-time event notifications. Technologies: React Native, Node.js, MongoDB, Express, Google Cloud.

AWARDS & ACHIEVEMENTS

Technical Leadership: Recognized as top-performing teaching assistant for three consecutive years, demonstrating ability to mentor and optimize complex systems.

System Architecture: Successfully architected and delivered scalable backend systems for commercial platforms, demonstrating expertise in API design and cloud infrastructure.

International Experience: Certified EPITECH Ambassador during study abroad at Keimyung University, South Korea, showcasing adaptability in multicultural environments.

Professional Certifications: Agile Coaching, Team/Operational Management, Crisis Communication, and IT Project Management from IONIS X.
