

Damien Demontis

Full Stack Developer

@ damien.demontis@epitech.eu

 LinkedIn |  GitHub |  demontis.dev

 Frouard, Grand Est, France

PROFESSIONAL SUMMARY

Passionate Full Stack Developer with 3+ years of experience creating innovative digital solutions that engage users. Proven track record in React Native, Unity game development, and AI-powered systems. Demonstrated ability to rapidly prototype user-centric features and create content that resonates with diverse audiences. Experience mentoring has fostered deep empathy for user needs and the ability to iterate quickly based on feedback. Eager to contribute to projects that push technological boundaries and create meaningful experiences.

EDUCATION

EPITECH - European Institute of Technology

Master in Computer Science; **GPA: 3.7/4.0**

Information Technology Expert

Nancy, France

Sep 2020 – Aug 2025

Key Highlights: Valedictorian of Nancy campus, Teaching Assistant for 3 consecutive years, Project-oriented learning methodology with emphasis on practical software development, Active member of CodingClub organizing workshops for high school students

Keimyung University

Study Abroad - Game Development & AI

International Exchange Program

Daegu, South Korea

Sep 2023 – Jul 2024

Focus Areas: Video game development, Artificial Intelligence, VR/AR technologies, Korean language learning

Video: [Study Abroad Experience](#)

SKILLS

Frontend: React, React Native, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Vue.js, Nuxt.js

Backend: Node.js, Express, Python, Java, C/C++, C#, PHP, Django, REST APIs, GraphQL

Databases: MongoDB, PostgreSQL, Supabase, Elastic Search, Firestore, MySQL

DevOps & Cloud: Docker, Kubernetes, GitLab CI/CD, Jenkins, Linux, Firebase, Google Cloud Platform

AI & Computer Vision: PyTorch, TensorFlow, OpenCV, PyQt6, Machine Learning

Game Development: Unity, C#, Unreal Engine

Languages: French (Native), English (C1 - TEPITECH 945/990), Italian (Conversational), Korean (A2)

EXPERIENCE

EPITECH

Pedagogical Mentor — MSc Curriculum

Nancy, France

Mar 2025 – Present

- Provide dedicated mentorship to Master of Science students, overseeing advanced topics in web development (Nuxt, Pinia, Deno), DevOps (Docker, Kubernetes, Jenkins), and broader software engineering best practices.
- Develop and maintain custom systems to optimize daily workflows, including a cloud-based facial recognition attendance platform leveraging Firestore, PyQt6, OpenCV, and Torch.
- Hold conferences on various tech topics, cybersecurity, AI, and History of Games, creating engaging content that motivates students.

EPITECH

Regional Assistant — PGE & MSc Curriculums

Nancy, France

Sep 2021 – Mar 2025

- Mentored students in PGE curriculum for 3 years in fundamental programming concepts (C, C++, SFML graphics programming, design patterns).
- Introduced containerization concepts with Docker and web development basics, contributing to dynamic learning environment.
- Recognized as top-performing teaching assistant, uniquely offered the assistant position for three consecutive years.

Leon'Art (Student Startup)

Technical Lead & Project Manager

Nancy, France

Apr 2023 – Mar 2025

- Led technical development as backend developer and project manager for a platform connecting artists and art enthusiasts.
- Successfully delivered complex commercial product with full payment integration using React, React Native, TypeScript, Node.js, Express, Stripe API, and Google Cloud Services.
- Implemented social network features promoting artist discovery, managed development team and coordinated project milestones.

+Simple

Web Developer Intern

Nancy, France

Apr 2023 – Aug 2023

- Led the comprehensive migration of the company's internal bill tracking system from a Django monolithic architecture to a modern Nuxt.js frontend and Django backend.
- Designed and implemented new features in the Nuxt.js framework, enhancing the overall user experience and expanding the platform's capabilities.
- Successfully completed the full system migration within the project timeline, reducing page load times by 50% and achieving a 30% increase in test coverage.

ACORIS Mutuelles

Web Developer Intern

Nancy, France

Jul 2021 – Dec 2021

- Collaborated with all company departments to create comprehensive specification sheets for new features.
- Developed a robust intranet solution using WordPress and PHP, facilitating internal communication and data sharing.
- Successfully delivered a fully functional intranet solution that improved company-wide communication efficiency.

PROJECTS

AI Facial Recognition Attendance System | [GitHub](#)

- Cloud-based attendance platform using Firestore, PyQt6, OpenCV, and Torch. Features real-time facial recognition, cloud database integration, and automated reporting. Successfully implemented at EPITECH.

Inept-Intruder - Multiplayer Game | [GitHub](#) | [Demo](#)

- Multiplayer game where CCTV man (player) helps another player go through a trapped factory environment. Built with Unity, C#, featuring multiplayer cooperation and CCTV assistance mechanics.

Wii Tanks Remastered | [GitHub](#) | [Demo](#)

- Recreation of the classic Wii Play Tank game with enhanced graphics and mechanics. Built with Unity, C#, featuring classic tank gameplay and smooth controls.

Leon'Art - Art Marketplace | [GitHub](#)

- Startup project that ended early 2025. Mobile and web application for buying and selling art with social features. Technologies: React Native, Node.js, MongoDB, Express.

AWARDS & ACHIEVEMENTS

Teaching Excellence: Recognized as top-performing teaching assistant, leading to being uniquely offered the assistant position for three consecutive years.

International Experience: Certified EPITECH Ambassador during study abroad at Keimyung University, South Korea.

Leadership: Active member of the CodingClub at Epitech, organizing workshops for high school students and introducing them to programming through engaging projects.

Professional Certifications: Agile Coaching, Team/Operational Management, Crisis Communication, and IT Project Management from IONIS X.
